Conflict Zone Information Bulletin - Airspace of Iran

This CZIB is issued based on information currently available to EASA and the European Commission to share necessary information for ensuring the safety of flights over zones of interest and indicating areas of high risk.

In view of the Iranian attack against Israel on 1 October 2024 and the announced Israeli retaliation, the Iranian airspace represents high risks to be considered by air operators in their risk assessments.

Air operators should closely monitor airspace developments in the region and follow all available aeronautical publications concerning the region issued by Iran, or on behalf of Iran by the Aviation Authorities of the neighbouring States, including information shared through the European Information Sharing and Cooperation Platform on Conflict Zones, alongside available guidance or direction from their national authorities.

Due to the unstable situation, ACAA will continue to closely monitor the situation, with a view to assess whether there is an increase or decrease of the risk for aircraft operators as a result of the evolution of the threat and risk situation.

If you need additional information, please check the EASA website:
